<u>Science Graduation Requirements</u> - Rasmussen

Action to be taken: Discussion, for board information only. No action needed.

A discussion on science graduation requirements was begun at the August 9th board meeting and will continue on August 31st.

The timeline for meeting standard on the biology end of course assessment has changed. The original graduation requirement was to be implemented in 2013, however, the legislature postponed it to 2015. OSPI Superintendent Dorn, has recommended that it be postponed two additional years to 2017.

The Issaquah School District Cabinet is recommending that until clarity and a final decision is reached, the District maintain our current science graduation requirement (two years of science).
