

R-2 Academics and Foundation

Policy Type: Results

Upon graduation, students will be academically prepared and confident to pursue higher education or specialized career training.

Students will:

Part 1

- 2.1 think and solve problems using both creative and critical thinking skills
- 2.2 read, write and speak the English language effectively for a wide range of purposes, including the interpretation and analysis of both literary and informational texts
- 2.3 understand geography, natural resources, and their shaping effect on government, economics and social patterns
- 2.4 understand the concept of community within the context of national and world history, comparative forms and influences of governments and major world religions
- 2.5 understand and appreciate the basic concepts of fine, visual and performing arts
- 2.6 develop an appreciation of at least one other world culture, which may include the understanding of the basic structure of another world language

Part 2

- 2.7 know and apply mathematics to a level of fluency that ensures a broad range of post-secondary opportunities and career choices
- 2.8 use analytic and scientific principles to draw sound conclusions
- 2.9 understand and apply current and emerging technologies, including artificial intelligence, to demonstrate technology literacy and use technology ethically and safely to solve problems using both computational and critical thinking
- 2.10 apply academic skills to life situations.
