

ENDS 6: Life Management

Monitoring Report

May 27, 2015

Students will live healthy, satisfying, and productive lives.

Interpretation:

- We interpret **students** to mean all students in our K-12 educational system and students who have recently graduated.
- We interpret **live healthy lives** to mean our students will make informed and appropriate choices regarding their physical, social and emotional condition.
- We interpret **live satisfying lives** to mean our students will demonstrate self-assurance about one's ability to accomplish his/her personal grade level goals and plan for post-secondary pursuits.
- We interpret **live productive lives** to mean students will progress through their K-12 learning experience, meeting grade level appropriate behavioral, social/emotional, and academic standards and apply those skills to their goals in life.

Reasonable progress: We have confidence that students are meeting the targets of Ends 6 when they progress through our K-12 educational system, engage themselves in the academic and co-curricular opportunities provided, and apply their acquired knowledge to make informed and healthy life choices. The monitoring report will also demonstrate that students' academic experiences prepare them for a wide range of post-secondary opportunities (of their choosing) and empower them to make informed decisions regarding their goals in life.

Students will:

6.1 Understand and apply principles of sound physical, mental and emotional health, nutrition, hygiene, and fitness;

We interpret 6.1 to mean students will move through the K-12 system experiencing curricular and co-curricular activities that will strengthen their understanding and application of principles of sound physical, mental and emotional health, nutrition, hygiene, and fitness.
